

# Cyber Essentials

## Helping to protect companies against the threat of Cyber Crime

Something to know about, not something to be scared of... make no mistake, the threat to your business is real and a genuine matter for concern but here at nTrust we take the uncertainty away, advise on best practice and allow you to get on with the business of running your company.

# How we help and protect companies of all sizes protect against the threat of cyber-attacks...

- ✓ Thoroughly assess all existing firewall and boundary settings
- ✓ Ensure that all systems are configured securely in a way that is appropriate for your business
- ✓ Set access codes, allowing you to control who has access and at what level
- ✓ Check all malware protection to ensure that it is robust and up to date
- ✓ Ensure that the latest supported version of all software is used and all necessary patches are applied

nTrust will assess your computer network and provide practical advice and assistance to companies wishing to reach certified level.

We have been helping to protect businesses for over 15 years, we are a proud Microsoft Partner and Cisco Systems Select Certified Partner... we know what we are talking about and whatever business you are in, you really need to be talking with us.

Cyber Essentials is a government-backed CyberSecurity standard for small businesses. nTrust can help you meet that standard.

“ The audit from nTrust was thorough and professional, my business may not have survived a bad attack but now I don't need to worry

– PW Accountants

## So Why Bother with Cyber Essentials?

Certification is a quality mark, it shows your company as responsible and trustworthy... qualities that are well regarded whatever the size of your business.

More than this, it demonstrates to your clients, suppliers, customers and employees that you take their data protection seriously, that you have recognised the threat and acted dutifully on their behalf.

## The Cyber Essentials certificate costs just £300.00 per year

Our IT Support packages will provide your company with ongoing IT management provision to keep your systems updated, protected and optimised with round the clock monitoring, fast jargon-free technical support and practical advice. We have plans to suit businesses of all sizes and we are always delighted to discuss precise requirements.

Our 98% client retention rate is testimony to our service and value
